

HydroSwing. The simplest, strongest, most efficient door. Period.

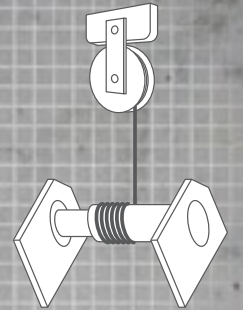

Modern equipment uses hydraulics for strength, reliability and efficiency to get the job done.

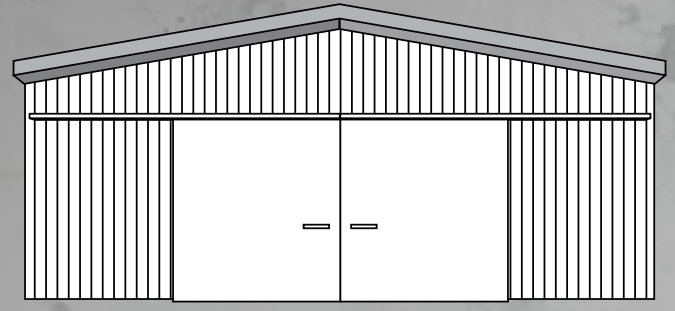

! PROBLEM Bi-Fold Door

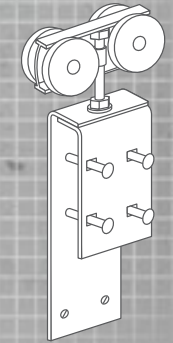

ISSUE:
Archaic Pulley System
Archaic pulleys, cables and straps deteriorate over time.

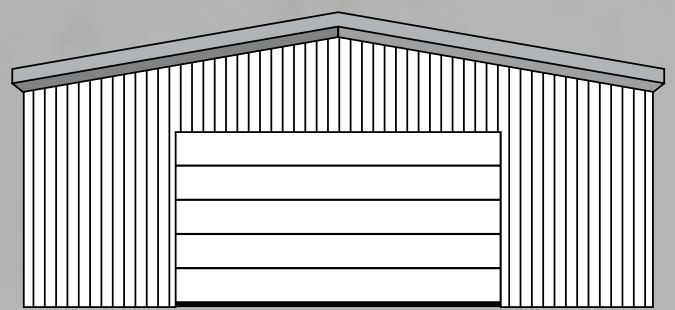

! PROBLEM Sliding Door

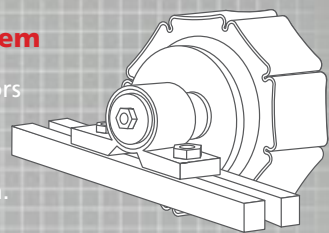

ISSUE:
Inefficient Track System
Aging tracks bind and stick, making manual opening difficult.

! PROBLEM Roll-Up Door

ISSUE:
Weak Roller System
Flimsy, bendable doors provide little security and strength.

! SOLUTION HydroSwing Door

Gone are the days of weak bi-fold pulleys and straps, sliding tracks that stick and bind, and flimsy, non-secure roll-up doors. HydroSwing doors provide the strength and security of a simple hydraulic system. The choice is obvious—the choice is HydroSwing.
